

Measurement Units

Across

3. an imperial measure about $\frac{1}{2}$ litre
5. an imperial measure a little less than 1m
7. $10 \underline{\quad} = 1$ centilitre
9. one $\underline{\quad} = 100$ cm
12. $1 \underline{\quad} = 1000$ m
14. $1000 \underline{\quad} = 1$ m
17. $1 \underline{\quad} = 1000$ kg
18. a $\underline{\quad}$ measure is good for measuring round someone's head
20. an imperial measure about 0.45 kg
22. you can measure the length of a corridor with this (7,5)

Down

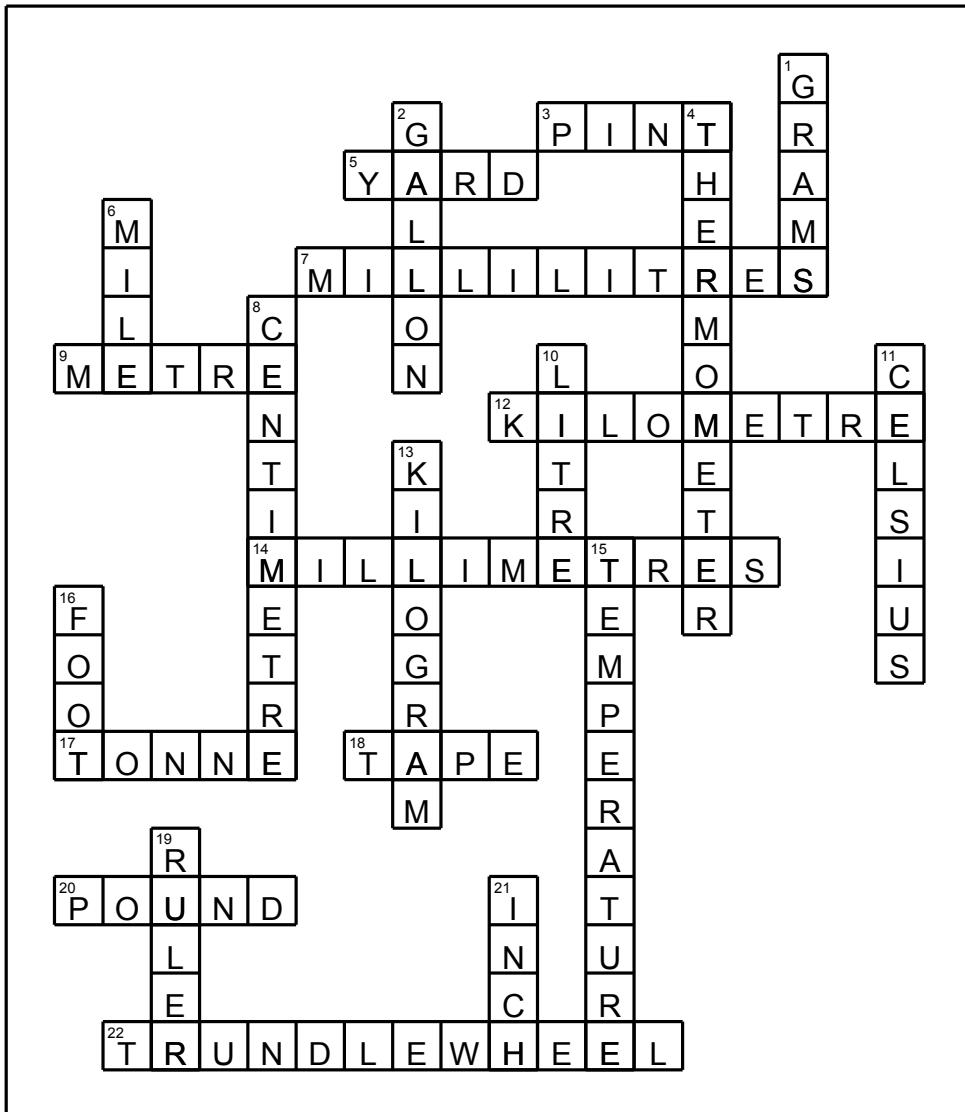

1. $1000 \underline{\quad} = 1$ kg
2. an imperial measure = 4.5l
4. used to measure temperature
6. an imperial measure = $1\frac{3}{5}$ km
8. $1 \underline{\quad} = 10$ mm
10. $1 \underline{\quad} = 1000$ ml
11. temperature is measured in $^{\circ}$
13. $1 \underline{\quad} = 1000$ g
15. how hot or cold something is
16. an imperial measure about 30cm in length
19. usually either 30cm or 1m long
21. $1 \underline{\quad} = 2.54$ cm- an imperial measure

Measurement Units

metre	gallon	trundle wheel	centimetre
kilogram	tonne	millimetres	litre
millilitres	grams	kilometre	celsius
temperature	thermometer	tape	ruler
inch	yard	foot	mile
pint	pound		

Measurement Units

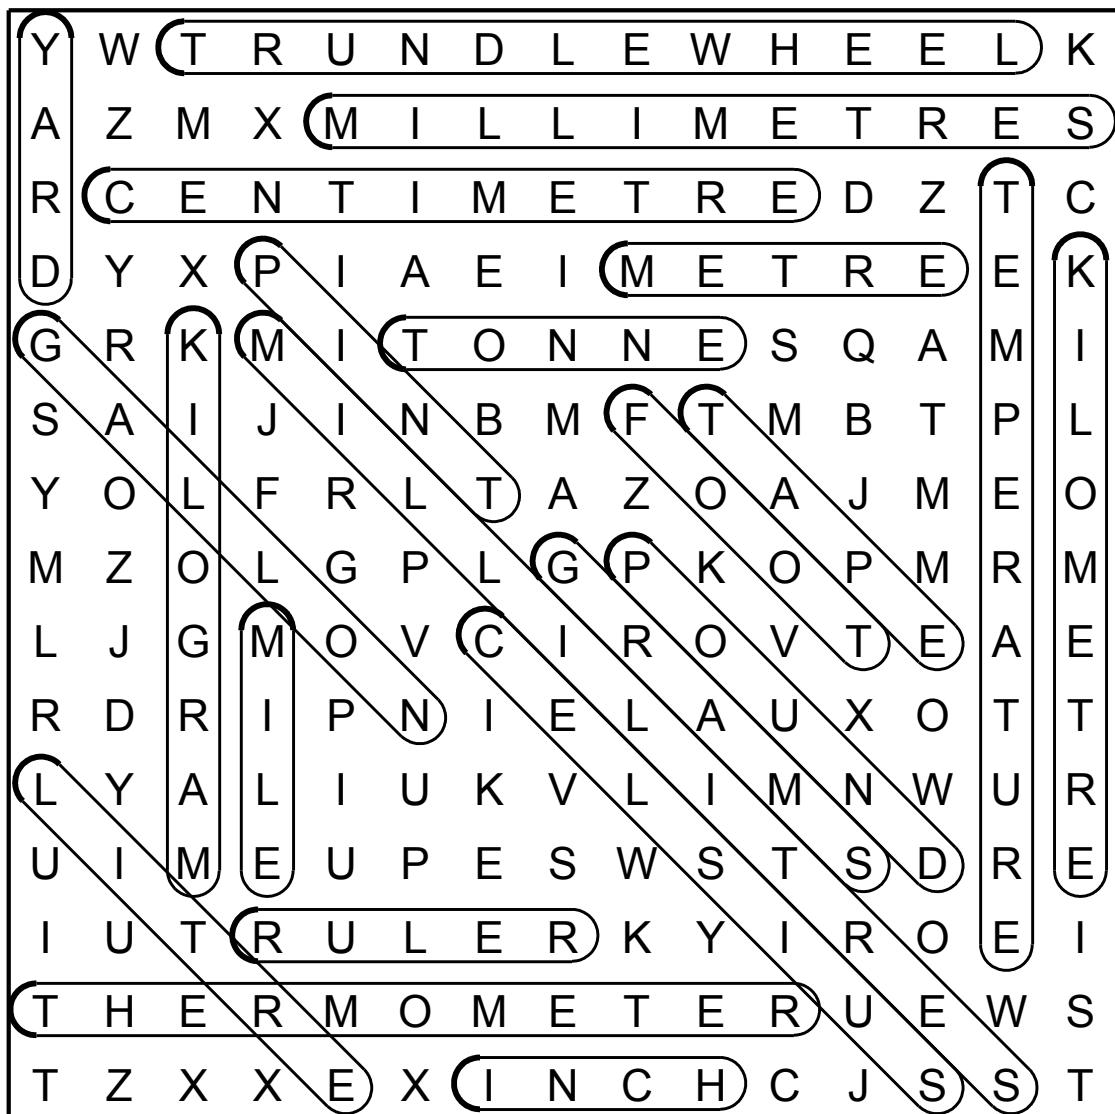

Across

3. an imperial measure about $\frac{1}{2}$ litre
5. an imperial measure a little less than 1m
7. 10 ____ = 1 centilitre
9. one ____ = 100cm
12. 1 ____ = 1000m
14. 1000 ____ = 1m
17. 1 ____ = 1000kg
18. a ____ measure is good for measuring round someone's head
20. an imperial measure about 0.45 kg
22. you can measure the length of a corridor with this (7,5)

Down

1. 1000 ____ = 1kg
2. an imperial measure = 4.5l
4. used to measure temperature
6. an imperial measure = 1 3/5 km
8. 1 ____ = 10mm
10. 1 ____ = 1000ml
11. temperature is measured in $^{\circ}$
13. 1 ____ = 1000g
15. how hot or cold something is
16. an imperial measure about 30cm in length
19. usually either 30cm or 1m long
21. 1 ____ = 2.54cm- an imperial measure
