Murder Mystery 4—Death at the Jigsaw Shop

A murder has been committed at the Jigsaw shop. The manager is dead and the week's takings have disappeared. There are 32 suspects. There are 5 clues. Each clue gives a fact about the murderer and eliminates half of the suspects.

The clues are jigsaws. To work out a clue, you must first make the jigsaw. Round the outer edge of the jigsaw are numbers. Each number represents a letter (a=1, b=2, c=3 etc). The first letter of the clue is underlined and then the clue reads clockwise round the shape.

Can you piece together the clues to solve the mystery?

Clue 1 _____

Clue 2 _____

Clue 3 _____

Clue 4 _____

Clue 5 _____
