Sounds.

Sound	ds are all	us. We _	many	sounds in a
day. When i	t is quiet we l	near sounds	such as	singing
or leaves rustling in the trees. We can also hear sounds				
such as car engines or children playing. There are sounds				
that make us feel such as ice-cream van music or the				
music to our favourite television show. Some sounds are				
scary such as hooting or doors				
Sounds are either man-made or All sounds				
occur due to parts of an object vibrating. There are many				
different wa	ays to make	sounds. Th	nese inclu	de banging
objects,	obje	cts, blowing	objects	or plucking
objects. Sounds are made to sound when they are				
placed on another larger object. An example of this is when a				
tuning fork is placed onto a				
Missing Words.

Experiment to see how many ways we can make sounds

1. What do we want to find out?

2. What are we going to use?

Yoghurt pot, rubber bands, some rice, scissors.

3. What are we actually going to do?

We are going to

4. What actually happened?

We could make sounds in the following ways.

5. What did we find out?

Sounds can be made by the doing the following things.
