***start • follow me if you have a 2D shape with 3 sides	I have a triangle • follow me if you have a 2D shape with 4 sides	I have a square • follow me if you have a 2D shape with 5 sides
I have a pentagon • follow me if you have a 2D shape with 6 sides	I have a hexagon • follow me if you have a 3D shape with 6 square faces	I have a cube • follow me if you have a 3D shape with 1 curved face
I have a sphere • follow me if you have a 3D shape with 1 curved face and 2 flat faces	I have a cylinder • follow me if you have a 3D shape with a square base and 4 triangular flat faces	I have a square based pyramid • follow me if you have a 3D shape with 4 rectangular faces and 2 square faces

I have a cuboid	I have a circle	I have a cone
• follow me if you have a 2D shape with 1 curved edge	• follow me if you have a 3D shape with 1 curved face and 1 flat face	The end
