Group Practice Activity

A Balancing Act

We are learning that the answer on the left of the equals sign is the same as the answer on the right of the equals sign.

Work out the following and record your answers in your Maths book.

1. Solve $67 + \square = 66 + 44$

2. Solve $42 + 38 = \square + 39$

3. What must be added to 34 to equal 55 + 35?

4. What must be added to 105 to equal 103 + 43?

5. Balance $67 + 33$ and 65 and $\square$

6. Balance $190 + 38$ with $180 + \square$

7. What balances $\square + 1020$ with $1010 + 67$?

8. What balances $\square - 39$ with $422 - 38$?

9. Solve $585 - 35 = \square - 34$

10. Solve $105 - 56 = 103 - \square$

11. 65 was taken away from what to equal $667 - 62$?

12. 208 was taken away from what to equal $790 - 29$?
