

Evaporation

STEP 1

Put a teaspoon of water in a saucer.

Put the saucer on a sunny windowsill, or leave it on a shelf in a warm spot. Leave the saucer until the next day.

What did you notice?

Explain why.

STEP 2

Put a teaspoon of water in another saucer.

This time place the saucer in a cool spot. Leave the saucer until the next day.

What did you notice this time?

Explain why.

Complete the following sentence about evaporation.

When water evaporates it changes from a _____ into a _____.
