

Exploring Shelters

- Roughly how many pieces are there in this structure?
- How are the pieces joined together?
- How many parts of this structure can you name? (Frame, canopy etc).
- What is the purpose of each part?
- Who or what is it designed for?
- What is it made out of?
- What alternative materials could this structure have been made with?
- Where and how was this shelter made?
- Why has the shelter been made in this way?
- How well would the person using the shelter be protected in a windy and rainy storm?
- Who will use it?
- Which constructions are strongest?
