

## Introduction

| What is it? | What it is used for? |
|-------------|----------------------|
|             |                      |
|             |                      |
|             |                      |
|             |                      |

## **Description**

| Parts that are | e used \ | What they are ι | ised for |
|----------------|----------|-----------------|----------|
|                |          |                 |          |
|                |          |                 |          |
|                |          |                 |          |
|                |          |                 |          |
|                |          |                 |          |

## **The Process**

- How it works or happens at the start, middle and end

|       | 2      |
|-------|--------|
| Cause | Effect |
|       |        |
|       |        |
|       |        |
|       |        |
|       |        |
|       |        |
|       |        |

## Conclusion
