## Describe the pattern.

2, 4, 6, 8,

The rule is $\qquad$
What are the next three numbers in the sequence?

3, 6, 9, 12,

The rule is $\qquad$
What are the next three numbers in the sequence? $\qquad$

16, 14, 12, 10,

The rule is $\qquad$
What are the next three numbers in the sequence?

5, 10, 15, 20,

The rule is $\qquad$
What are the next three numbers in the sequence?

90, 80, 70, 60,

The rule is $\qquad$
What are the next three numbers in the sequence? $\qquad$
$\qquad$

26, 28, 30, 32,

The rule is
What are the next three numbers in the sequence?

Can you make a sequence, with five numbers, which has 6 and 12 in it?

Can you make a sequence, with five numbers, which has 4 and 12 in it?

Can you make a sequence, with five numbers, which has 5 and 20 in it?

Can you make a sequence, with five numbers, which has 7 and 16 in it?
