

# Life Processes

## Dead or Alive?

There are seven things all living organisms do -these are called Life Processes. An organism is only alive if it does all seven life processes!

## The Seven Life Processes –

1. M \_\_\_\_\_ - Moving parts of the body
2. R \_\_\_\_\_ - Producing offspring
3. S \_\_\_\_\_ - responding and reacting
4. N \_\_\_\_\_ - Getting food to stay alive
5. E \_\_\_\_\_ - Getting rid of waste
6. R \_\_\_\_\_ - Turning food into energy
7. G \_\_\_\_\_ - Getting to adult size

Can you think of a mnemonic to remember these processes. eg MRS NERG.

Name .....
