

## Opposites

This homework is straightforward.

I would like you to make a list of words that are the opposite of each other.

For example, **short** is the opposite of **tall**.  
**Night** is the opposite of **day**.

Use the picture opposite to get you started and try and make as long a list as possible.

If you've got some spare time you could always try and use your list of words to make a game for young children to play. Maybe you could make a card game where they have to match the cards that are opposites of each other.
