Task Card for Multimedia Presentation and Use of the Internet

Your task is to produce a Multimedia Presentation about a mountain environment, using the Internet/Encarta and Powerpoint.

You need to cover the following main areas:

- What is special about the area?

- What is the climate like?

- What do people do for work?

- What is there for tourists to do?

- What environmental issues are there?

Your presentation may include a slide for each of these areas.

Try to include some pictures from the Internet or elsewhere.

Concentrate first on getting the main information into your document, then you can try and add some fancy features like extra colours, noises and effects.

HINT: Start your research using 'Yahooligans' (the search box on the school homepage). Enter 'Lake District' (or whatever your mountain area is) in the search box and then use the links to find your information.

Use the menu bar at the bottom of your screen to switch between programmes.

SAVE YOUR WORK REGULARLY!
