

Mass (weight)

Make sure your scales are properly balanced and that they can move freely without catching on books or pencil cases etc.

Today we are going to estimate and weigh various objects.

Remember to work collaborately

Draw a chart in your book like the one below, using a ruler!

Object to Weigh	Estimated Weight	Actual Weight
Felt tip pen		
1 Unifix cube		
10 Unifix cubes		
Scissors		
A General Book		
Ruler		
A cup		
	60 g	
	60 g	
	60g	

- Can you find any objects in the classroom that weigh approximately 60 grams? Add them to the chart.
- Make a piece of plasticine weigh 40 grams.
- Make a piece of plasticine weigh the same weight as the scissors.
- How many Unifix cubes weight 100g?
200g?
450g?
- Can you estimate how heavy 1000 cubes would be? How can you check your right?
