

Mission Possible-but Challenging!

Are you up to the competition?

Your mission, which you must accept, is to build a shelter for two Lego figures (we'll call them Charles and Camilla). There will be a prize for the best shelter, with certificates for the two runner-up shelters.

The shelter will be judged as follows:

1. It must be able to withstand a 1 Kg weight being placed on the roof. The two figures must remain protected and undamaged.
2. The two figures must remain dry. This will be judged by placing the two figures on a tissue. The tissue must remain dry when 200 ml of water is poured over the top of the shelter.
3. The shelter and the figures inside must be able to withstand a 30 second blast from an electric fan.
4. The shelter must be completed within four hours of lesson time including today's lesson.
5. The competition entry forms must be completed to the judge's satisfaction.
