Comparisons

We are learning to add and subtract using comparisons of sets without counting down or counting up.

Use blocks to make these problems and compare.

1. Sue has 2 lollies and buys 6 more. How many lollies does she have?
2. Peter had 12 toy cars but gave 4 away to his brother. How many does he have left?
3. If I have 7 books on the shelf and take one off to read, how many books are left on the shelf?
4. Ten children come to a party. Four have to leave early. How many are left?

Now see if you can do these without using equipment.

5. 28 children are in Room 9, six children from Room 8 join them. How many children are there all together?
6. I have \$42 but I need to give my friend \$2. How much money will I have left?
7. There were 71 marshmallows in the bag. I ate six. How many do I have now?
8. 31 children come to school on Monday. On Tuesday there are two less. How many children are there in school on Tuesday?
9. In a packet of biscuits there are 32 biscuits. I buy another packet with 11 in. How many biscuits do I have all together?
10. If 60 cars are parked in the sales lot and four get sold, how many are left for sale?
