### **When one number is near 100.**

We are learning to solve some addition and subtraction problems by adjusting one number to the nearest hundred.

Answer the following in your Maths book.

1. Aroaha had 834 stamps in her collection. She gave 99 to her brother so that he could begin a collection. How many does she have now?
2. 456 people booked seats for the movie but 98 didn't turn up. How many people saw the movie?
3. 297 children from our school joined with 198 from the High School for sports. How many children were there?
4. If 818 people go to the concert on Saturday and 698 go on Sunday, how many people go over the whole weekend?
5. The holiday for four of my friends cost \$1000 but one person couldn't go so it only cost \$797. How much did it cost for that person?
6. 1200 people wanted to enter the triathlon but there were only 998 places left. How many people were disappointed?
7. What number should I add to 692 to make 801?
8. What number should I take from 1000 to make 311?
