

## Ordering decimals

### Question

Put these decimals in order with the smallest first:

1.5, 1.375, 1.4, 1.3,  
1.45, 1.35, 1.425,  
1.525, 1.475, 1.325.

### Hints

Don't be confused by the number of digits after the decimal point; it is the value of each digit that matters.

1.375 has 3 digits after the decimal point. Despite having only 1 digit after the decimal point, 1.4 is still a greater number.
